Coaching Workshop for Resource-Efficient and Cleaner Production (RECP)

RECP Club 2020 (#1)

Module 6: Action Planning

AGENDA

Georgia

13 April 2021

Start: 11:00 (GMT+4)

End: 14:00 (GMT+4)

Format: online video conference

Language: Georgian

Action implemented by:

Background

United Nations Industrial Development Organization (UNIDO) is implementing a Resource Efficient and Cleaner Production Project (RECP) in Georgia. The objective of the project is to promote more efficient use of resources (energy, materials and water) and reduce risks to the environment and human health in Georgian enterprises. The project is a component of the regional program European Union for Environment (EU4Environment) implemented in the Eastern Partnership Countries.

RECP Project in Georgia aims to demonstrate RECP opportunities in the focus manufacturing sectors by developing business cases and promote more efficient use of resources (energy, materials and water) and reduce risks to the environment and human health in Georgian enterprises (www.recp.ge).

Under EU4Environment, UNIDO is supporting establishment of so-called RECP Clubs of manufacturing enterprises in different regions of Georgia. The RECP Clubs bring together small and medium size enterprises (SMEs) from the same region and take them jointly through an intensive training and coaching program, leading to a customized RECP action plan for all member companies upon completion of the clubs' activities. After completion of the RECP Clubs' activities, the club member SMEs get UNIDO certificates for successful participation in the project.

The current Agenda is dedicated to the last Module of the RECP Clubs' program consisting of six modules.

Purpose and outcomes of the Training

The RECP Clubs' workstream under the project is aimed at developing and piloting a lean support model for enterprises, in particular smaller businesses. The model will be scale-able and replicable, in that after initial trials in four municipalities it can be made available continuously to more regions and ultimately indeed throughout the country.

The RECP training help SMEs to understand opportunities and benefits of RECP application for the companies; implications of intensive use of energy, water and materials; why efficient use of energy, water and materials is a necessity; how to build company's energy and water profile; why to properly manage materials and waste; how to avoid/reduce/recycle waste; how to manage/reduce chemicals and hazardous waste; what an RECP action plan is and why it is needed; how to build RECP action plan. The RECP application creates significant capacities for continued improvements by identifying viable economic and environmental solutions for the companies.

Module 6 – Action Planning is focuses on bringing together resources efficient and cleaner production options from different topics into an integrated approach for enterprise with short, medium and longer-term goals and actions and appraising these in both physical units (kWh, ton, m³, etc) as well as their monetary value.

Initially, participants of the RECP Programme were provided much guidance and support. To provide those, various activities were implemented in close contact with the RECP Clubs' Facilitator and the club member SMEs. The club's member SMEs were trained using the different tools (presentations, templates, worksheets, etc.). At the end of the Programme period, the trainees are able to develop an RECP action plan and implement it as a result of full-scale RECP assessment by themselves.

Participants

The training participants are representatives of local Municipalities hosting the Clubs and the club member SMEs. The Club meetings are prepared with support of National Implementing partner

(NIP) the Energy Efficiency Centre of Georgia (EECG) leading the training and conducted by the national RECP Clubs' facilitator who is an expert on RECP.

Registration

The tentative number of participants for every workshop is about 15 persons.

About the EU4Environment Action

The "European Union for Environment" (EU4Environment) Action aims to help the six partner countries: Armenia, Azerbaijan, Belarus, Georgia, Republic of Moldova, Ukraine preserve their natural capital and increase people's environmental well-being, by supporting environment-related action, demonstrating and unlocking opportunities for greener growth, and setting mechanisms to better manage environmental risks and impacts.

The Action is funded by the European Union and implemented by five Partner organizations: OECD, UNECE, UNEP, UNIDO and the World Bank based on a budget of some EUR 20 million. The Action implementation period is 2019-2022. More information: www.eu4environment.org

Agenda of RECP Training on Module 6 (Georgia)

Time (GTM+4)	Item
	Date: 13 April 2021 Place: Webinar
10:45-11:00	Registration
11:00-11:40	Assess progress on Chemicals Efficiency & Chemical Waste Minimization Baseline chemicals profile and indicators Business case RECP options to increase chemicals efficiency & minimize chemical waste Data gaps <i>Nikoloz Javshanashvili, Energy Efficiency Centre Georgia</i>
11:40-11:45	Break
11:45-12:30	Technical content What? - Role of an action plan; Why? - Benefits of using the action plan; How? - Building the RECP action plan - Monitoring benefits out of RECP options implementation <i>Nikoloz Javshanashvili, Energy Efficiency Centre Georgia</i>
12:30-12:35	Break
12:35-13:20	Practical assignment -- Introduction of worksheet on Action Plan; - Arranging RECP options according to the topic of training module 6; - Building a hierarchy of the RECP measures, determining the levels of implementation feasibility;

	- Carrying out a technical, economic, environmental & social assessment of RECP options. <i>Nikoloz Javshanashvili, Energy Efficiency Centre Georgia</i>
13:20-13:25	Break
13:25–13:50	What is the next step? Last tasks Beyond RECP <i>Nikoloz Javshanashvili, Energy Efficiency Centre Georgia</i>
13:50-14:00	End of the training, feedback <i>Nikoloz Javshanashvili, Energy Efficiency Centre Georgia & Participants</i>
